

### PLA Lined Hinged Lid Containers

PrimeWare has the largest selection of bagasse hinged lid foodservice containers. All hinged containers are biodegradable and compostable. PrimeWare containers have a very secure locking system. These sturdy containers hold hot or cold food items and are microwave and freezer safe.

The addition of PLA lining to PrimeWare containers does not change any of their Eco-Friendly properties. PLA-lined containers provide a superior moisture and grease barrier for hot foods. The biodegradable and compostable PLA lining virtually eliminates all the moisture issues previously associated with very hot foods and bagasse containers.
